# WHAT IS THE OEM ENGINEERING TECHNOLOGY TRAINEESHIP?

The Original Equipment Manufacturing (OEM) Engineering Technology Traineeship prepares trainees for work as future engineers/technicians and combines theory and practical industry experience to provide a basic understanding of manufacturing and engineering processes.

## DURATION

This is a full time course, starting in September with 12 weeks work based learning in Combilift and 26 weeks classroom based learning in Monaghan Institute.

## COURSE CONTENT

Upon successful completion, students will be awarded a Level 5 QQI in Engineering Technology and City & Guilds Level 2 in Hydraulics. In addition individuals will complete Lean Manufacturing workshops.

### Course modules include:

- Auto Electricity
- Engineering Processes
- CAD (2D)
- Electronics
- Engineering Theory
- Lean Manufacturing
- Health & Safety at Work
- Control Systems
- Engineering Drawing

## ELIGIBILITY

Applicants must:

- Be 16+;
- Have achieved Leaving Cert or equivalent or a QQI Level 4 or relevant work experience;
- Or achieved GCSEs, NVQ Level 2, BTEC or equivalent qualifications or relevant work experience.
- Applications are also welcome from those in employment who are seeking to upskill or reskill into this industry.

## COURSE COSTS

- No Course Fees.
- A Training Allowance is paid to those who are in receipt of a Social Welfare Payment.
- Other possible entitlements; Travel or Accommodation Allowance, Meal Allowance, Or access to the CETS Childcare scheme.
- For those not in receipt of a Training Allowance Combilift will provide a bursary.

## HOW DO I ENROL?

**STEP 1.** Register through [www.fetchcourses.ie](http://www.fetchcourses.ie) (An Application form will be posted/emailed to you)

**STEP 2.** Complete an application form and return to [training@cmetb.ie](mailto:training@cmetb.ie) or via post to Recruitment Office, FET Campus, CMETB, Dublin Road, Co Cavan, H12 FW53.

**For more information please contact course recruitment:**
